

The Seal Easy Trim is a highly advanced rotary cutter. Its unique design features make this manual cutter the perfect accompaniment to a busy imaging and/or finishing business. The Easy Trim is capable of cutting materials ranging from thin tissue through to heavy cardboard and plastics in any width.

Featuring a unique double clamping cutting assembly, the SEAL Easy Trim enables the operator to effect accurate cuts without the need to hold the media in place.

The Easy Trim has a strong aluminum base and edge rules for accurate cutting, an open ended cutting assembly accommodating to work wider than 1524 mm and an ergonomic cutting head design for ease of use.

With its own stand and waste catcher, this machine represents one of the most attractive, value for money, full solution cutters available. Its smooth, ultra modern design guarantees years of good looks.

The SEAL Easy Trim provides the following features

Ease of Use

- Anodised aluminium stay clean base
- Free standing design with waste catcher
- No overhead guides to obstruct the cut line
- Smooth operation
