

The SEAL Multicut is a versatile wall mounted board cutter. Designed to meet the requirements of a busy production house, this manual cutter can cope with a wide range of substrates up to a maximum thickness of 13mm and will handle materials to a maximum length of 1600mm.

The SEAL Multicut has a rotating cutting head with three blades; a standard cutting blade, a glass cutter and a scoring blade. The cutting head is designed to make blade changes extremely quick and easy. The effective clamping system will hold even the thickest substrate at the desired angle for cutting and the clear rule along the cutting line aids alignment.

Operating in a vertical plane the SEAL Multicut is designed to deliver square, accurate results making the maximum effective use of available space.

This multi-purpose cutter represents a valuable addition to any graphics orientated business. It will increase productivity, reduce wastage and errors whilst remaining easy to use and extremely versatile.

The SEAL Multicut provides the following features

- | | |
|----------------------------|--|
| Ease of Use | <ul style="list-style-type: none"> ● Simple manual operation ● Smooth sliding cutting head ● Work can be clamped at any angle ● Quick change cutting head ● Clear rule along cutting line for ease of alignment ● Graduated rule along base for accurate positioning |
| Optimum Performance | <ul style="list-style-type: none"> ● Robust wall mounted design ● Super-grip clamp for accurate cutting ● Rotating cutting head with three cutting blades ● Maximum substrate thickness: 13mm ● Maximum cut length: 1600mm |
