

Stoplight backing films offer a range of unique light-blocking film solutions for finishing portable display systems. Available in different thicknesses and adhesive formulations, these backing films provide the ultimate finishing result for the Pop-up and Roll-up display market.

Stoplight 115

This heat-activated film has been designed especially for the Roll-up displays and Banner stands. It is specifically designed with an essential light-blocking core. When used in conjunction with Jet Guard Deep Crystal Matte it provides the ultimate, high quality finishing solution.

PS Stoplight 115

This pressure sensitive film has been designed especially for the Roll-up displays and Banner stands. It allows users with cold lamination facilities to produce a profitable finishing solution in this display arena. Like all Stoplight films it has an essential light blocking core. The water-based adhesive ensures a strong permanent bond to digital media and when used with Print Shield Deep Crystal, PS Stoplight 115 has outstanding visual results.

Stoplight 220

Ideal backing film for all Pop-up Display systems, Stoplight 220 is a high quality backing film providing a rigid, yet flexible opaque backing solution. Constructed with the SEAL patented aluminium core layer, it ensures no light can get through to distort the final image. The film has excellent lay flat memory and panels, once created, are easily rolled for storage. This heat-activated film is ideal for use on end and

curved panels where flexibility is key and excellent results are achieved when used with Jet Guard Deep Crystal.

PS Stoplight 220

This pressure sensitive film has been designed especially for users with cold lamination facilities to produce a profitable finishing solution in the Pop-up Display arena. Like all Stoplight films it contains an essential light-blocking core. The filmic release liner ensures a smooth high quality coating and minimises piping of liner. The water-based adhesive ensures a strong permanent bond to a range of digital media and is recommended with Print Shield Deep Crystal to achieve the best finishing results.

Stoplight 320

This heat-activated rigid backing film is a key component for all Pop-up Display systems. It provides the extra rigidity needed, making it the ideal solution for finishing the main front panels. Like Stoplight 220, Stoplight 320 is also constructed with the SEAL patented

aluminium layer to ensure that no light can get through to distort the final image. The film has excellent lay flat memory and once panels are created they are easily rolled for storage. When used with Jet Guard Deep Crystal this film provides a high quality finish.

PS Stoplight 320

This white pressure sensitive backing film is the latest addition to the SEAL Stoplight range. It is ideal for use with a wide range of Pop-up Display systems. PS Stoplight 320 provides users, who prefer to work with pressure sensitive materials, the option to produce a profitable finishing solution. The white backing maintains white balance when using thin inkjet media. Like all other Stoplight films it has the essential light-blocking core, which gives excellent lay flat results to reduce curl. The filmic release liner ensures a smooth high quality coating and minimises piping. The water-based adhesive ensures a strong permanent bond to a range of digital media and is ideal for use with Print Shield Deep Crystal.

Technical Specifications

	<i>Adhesive</i>	<i>Laminate/ Carrier</i>	<i>Release liner</i>	<i>Thickness (micron)</i>	<i>Core size</i>	<i>Bond</i>	<i>Recommended speed</i>	<i>Recommended temperature</i>
Stoplight 115	EVA	Metalised OPP	N/A	115	76 mm	Permanent	1 - 1,5 mpm	95 - 100 °C
PS Stoplight 115	Water-based	Metalised OPP	Polyester	107	76 mm	Permanent	1 - 1,5 mpm	10 - 40 °C
Stoplight 220	EVA	Polyester / Aluminium	N/A	220	76 mm	Permanent	1 - 1,5 mpm	95 - 100 °C
PS Stoplight 220	Water-based	Polyester / Aluminium	Polyester	180	76 mm	Permanent	1 - 1,5 mpm	15 - 40 °C
Stoplight 320	EVA	Polyester / Aluminium	N/A	320	76 mm	Permanent	1 - 1,5 mpm	95 - 110 °C
PS Stoplight 320	Water-based	Polyester / Aluminium	Polyester	305	76 mm	Permanent	1 - 1,5 mpm	15 - 40 °C
